From: **Laurent Leca** <lleca@fastbooking.net>

Hi

We won't provide the new Quick Search module yet because building it implies going further on the "seamless integration" topic, which will only be available in the version 5.3 (lines 98 & 99 of the [Features Set](#)).

In the meantime, there are 2 solutions for webmasters:

1. Do nothing: we support all existing parameters in existing links (direct links or current Quick Search module), the redirection server does the translation. This is the case for all the pilot hotels.
2. Build new links and/or enhance the existing Quick Search module, and have the modified versions of the links/module behave like you want: open in a new tab, in the current window, whatever.

Basic redirection is still the same, indeed: the redirection server points the user to the correct BE version, with the configured parameters. So you can build links or modify the existing Quick Search module to change the link opening method, just keep the same root you mentioned:

=> <http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284>

and use either legacy parameters:

- arrival date: &fromyear=2014&frommonth=8&fromday=25
- departure date: &toyear=2014&tomonth=8&today=30
- number of adults: &adulteresa=2
- number of children: &enfantresa=1
- language: &langue=it
- currency: ¤cy=SGD, or CurrencyLabel=SGD, etc. I don't know the full list of parameters that have been used for the last 14 years, but the technology team makes sure we catch all of them, and keeps adding some obscure ones when we encounter them.

=> <http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284&fromyear=2014&frommonth=8&fromday=25&toyear=2014&tomonth=>

<http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284&fromyear=2014&frommonth=8&fromday=25&toyear=2014&tomonth=>

or new parameters:

- arrival date: &arrival=2014-08-25
- departure date: &departure=2014-08-30
- number of adults for room 1: &adults1=2
- number of children for room 1: &children1=1
- language: &locale=it_IT
- currency: ¤cy=SGD

=> http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284&arrival=2014-08-25&departure=2014-08-30&adults1=2&children1=1&locale=it_IT¤cy=SGD

http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284&arrival=2014-08-25&departure=2014-08-30&adults1=2&children1=1&locale=it_IT¤cy=SGD

Both links end up on the same exact search results page.

Bonus new parameters, working only for Attraction:

- number of desired rooms: &rooms=3 (only up to 3, still) ;-)
- adults occupation for each room:
 - adults for room 1: &adults1=2
 - adults for room 2: &adults2=2
 - adults for room 3: &adults3=1
- children occupation for each room:
 - children for room 1: &children1=1
 - children for room 2: &children2=2
 - children for room 3: &children3=1
- room type, to put the selected room type at the top, despite its price: &accommodation=Sagredo-Suite
- rate type, to hide other offers: &rate=ADVANCE

=> http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284&arrival=2014-08-25&departure=2014-08-30&rooms=3&adults1=2&children1=1&adults2=2&children2=2&adults3=1&children3=1&locale=it_IT¤cy=SGD&accommodation=Sagredo-Suite&rate=ADVANCE

http://www.fastbookings.biz/DIRECTORY/dispoprice.phtml?Clusternames=ITVNCASagredo&Hotelnames=ITVNCASagredo&property=itven15284&arrival=2014-08-25&departure=2014-08-30&rooms=3&adults1=2&children1=1&adults2=2&children2=2&adults3=1&children3=1&locale=it_IT¤cy=SGD&accommodation=Sagredo-Suite&rate=ADVANCE

My technical knowledge ends up here but I'm sure Alessandro will be able to use his magic and play with the parameters above, and have links open in a new tab.

Otherwise, Alessandro, please let Gilles and/or Thomas know.

Thanks,
Laurent

Se la data impostata è precedente alla data del giorno, il link perde il numero di notti e passa 1 notte come lunghezza soggiorno

Link Diretti la Booking Engine

Questo link permette di aprire qualsiasi versione di front end (desktop o mobile) a prescindere quella che usa il cliente:

<http://redirect.fastbooking.com/DIRECTORY/crs.phtml?clusterName=CONNECTNAME>

Ecco ad esempio un gruppo in Lux:

<http://redirect.fastbooking.com/DIRECTORY/crs.phtml?clusterName=crsittownhouse>

<http://redirect.fastbooking.com/DIRECTORY/crs.phtml?clusterName=ittownhouse>

E uno in Attraction:

<http://redirect.fastbooking.com/DIRECTORY/crs.phtml?clusterName=crsplandiamond>

<http://redirect.fastbooking.com/DIRECTORY/crs.phtml?clusterName=plandiamond>

Solo ad uso interno.
